

The virus that causes COVID is transmitted via tiny aerosols, and indoor spaces are the most hazardous. CoolSys has developed COVID Mitigation Solutions to help our customers achieve healthier indoor air.

Both the CDC and ASHRAE recommend upgrading commercial HVAC systems to improve air safety and lower the viral circulation in higher-risk indoor spaces such as [CUSTOMIZE WITH FACILITY TYPE: schools, medical facilities, multifamily properties, restaurants] and other shared spaces. CoolSys' technology-driven measures include High Filtration, Humidity Control, Air Ionization, UV-C Lighting.
